

Doorway and basin conflict

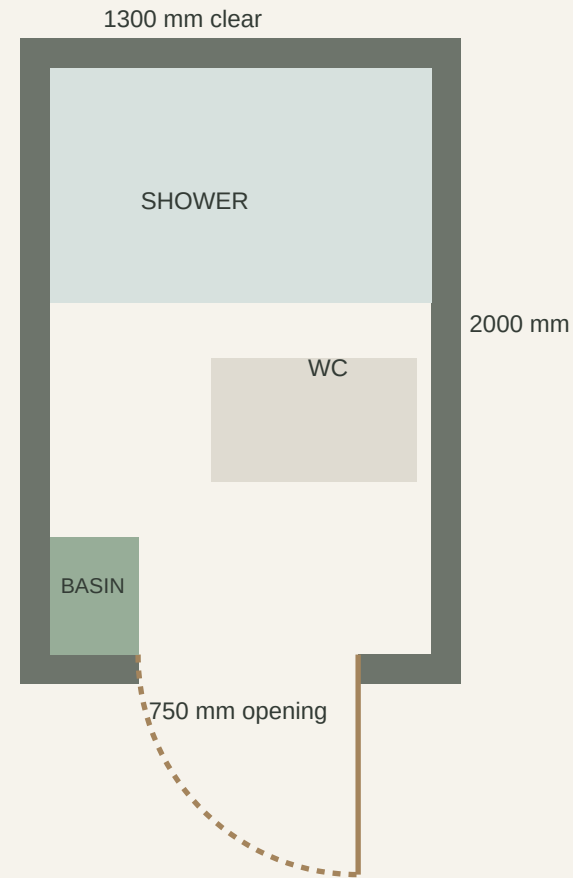

Source geometry stays fixed. Only the basin alternative below is proposed.

A / Current source

A: 400 x 320 mm basin overlaps the doorway by 250 mm.

B / Fixture-only alternative

B: 400 x 300 mm wall-hung basin rotates onto the south wall in the same corner.

Keeps all walls, door, WC, shower and vents. Requires a short plumbing return and installer verification.

Decision drawing only. Alternative B is not approved or applied to the source model.
